Biography

FAM is a French visual artist, born in 1987, who lives and works near Paris.

She holds a master's degree in computer engineering from Panthéon-Sorbonne University, where she spent two years on a doctorate, before devoting herself entirely to painting.

Her narrative paintings, centred on how femininity is portrayed, are imaginary and often provocative constructions in which parts of her own life become surreal or hyperrealist pastiches.

Statement

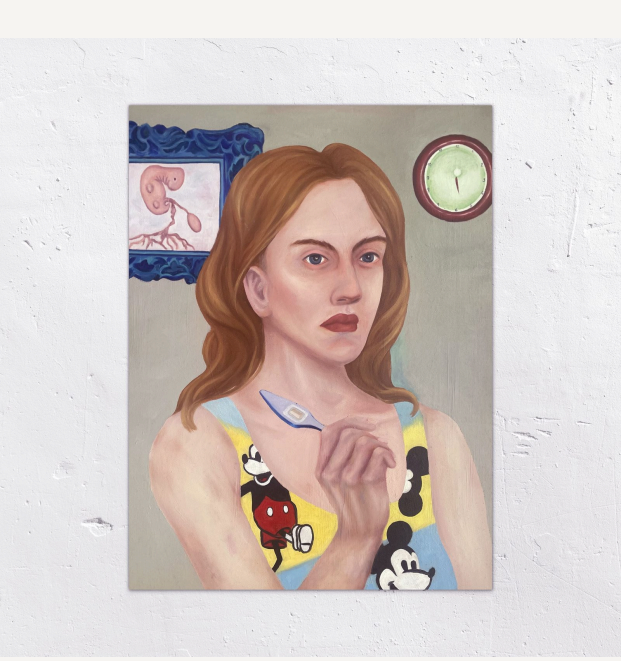

Fascinated by the expression of a gaze and the movement of bodies, FAM tries to convey the emotion and strength they give off. The figures she paints are her representatives in our world.

She explores psychological states, beauty, identity, the body, gender, cognitive biases and social issues. Her aim is to question rather than to judge.
